one's personal claims regarding personhood will influence his moral belief regarding embryo adoption in chapter one i consider the personhood of the human embryo if the human embryo is a person we are morally obligated to permit the practice of embryo adoption as an ethical means to save human persons however for those who do not claim that an embryo is a person at conception embryo adoption is not a necessary practice because we have no moral obligation to protect them there are still others who claim that personhood is gained at some point during gestation when certain mental capacities develop i offer my own claim that consciousness and sentience as well as the potential to be self conscious mark the beginning of personhood embryo adoption raises several questions surrounding the institution of marriage due to its untraditional method of procreation embryo adoption calls into question the role of procreation within marriage in chapter two i explore the nature of the marriage relationship by offering lisa cahill's definition of marriage which involves both a spiritual and physical dimension and then i describe the concept of marriage from different perspectives including a social religious and a personal perspective from a personal perspective i explore the relationship between

marriage and friendship finally i describe how the concept of marriage is understood today and explore the advantages to being married as opposed to the advantages of being single embryo adoption changes the way we customarily think about procreation within a family because in embryo adoption couples are seeking an embryo from another union to be implanted into the woman this prompts some philosophers to argue that embryo adoption violates the marriage relationship in chapter three i further consider the impact of embryo adoption on the family as an extension of the marital relationship as well as the impact of embryo adoption on the traditional roles of motherhood and fatherhood i examine motherhood by looking at how some philosophers define motherhood and when these philosophers claim a woman becomes a mother after considering these issues regarding motherhood i examine the same issues surrounding fatherhood
